TRACKER999 HAVE TEAMED UP WITH IGNITE INSURANCE BROKERS LTD, AWARD WINNING FLEET INSURANCE SPECIALISTS

THEY OFFER A FIRST-CLASS SERVICE WHEN IT COMES TO FLEET INSURANCE AND WE ARE HERE TO PROTECT THEIR CLIENTS' VEHICLES WITH OUR SUITE OF INSURANCE APPROVED DEVICES.

Car trackers are used to monitor and safeguard your vehicle and are an ideal solution for those looking to have peace of mind when leaving their vehicle unattended across Europe. Acting as an excellent theft recovery solution, as well as theft prevention, our wide range of GPS car trackers are sure to provide the highest level of added security.

All of our GPS car trackers have unique features to choose from, depending on your specific requirements. They can be fitted quickly and efficiently by our approved installation engineers which are located throughout the UK.

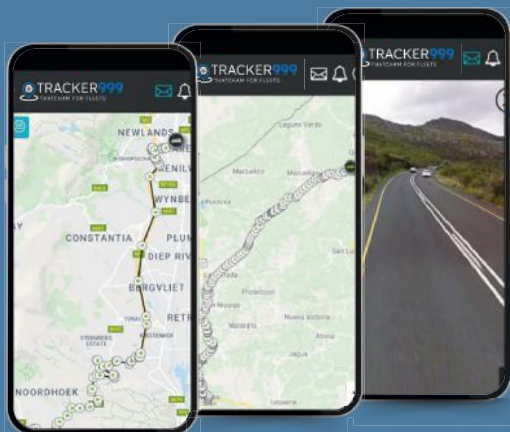

THATCHAM APPROVED S5 VEHICLE TRACKERS

S5 trackers are the highest specification Thatcham-approved vehicle tracking systems available on the market. Previously known as Category 5, Category S5 is the new Thatcham classification for these vehicle trackers.

The S5 is often required by insurance companies because it offers the highest level of security, which greatly increases the chances of recovering your vehicle should it ever be stolen.

For added security, Thatcham-certified S5 trackers also come with driver recognition systems. These systems work using tags that designated drivers keep on their person. Should the car be moved without one of these tags in close proximity, the vehicle tracker will send out an alert.

To guarantee that your tracking device is working correctly, all of our products come with free nationwide installation. Carried out by one of our Thatcham-approved engineers. The correct installation of your S5 tracker will give you peace of mind that your vehicle is protected and that the job was carried out by a qualified expert.

WHO IS THATCHAM?

Thatcham is the only "not-for-profit" insurer-funded research centre in the UK and has been at the forefront of vehicle security since the 90s. Thatcham created the S5 and S7 certification for vehicle tracking systems, which verifies the functionality, design and performance of the products. Thatcham are NOT a brand of tracker, they are more like a governing body.

THE TRACKER999 PLATFORM IS AVAILABLE AS A NATIVE APPLICATION FOR YOUR MOBILE OR TABLET DEVICE.

IGNITE INSURANCE BROKERS LTD IS REGISTERED IN ENGLAND AND WALES UNDER COMPANY NO.11737862, REGISTERED OFFICE ADDRESS: JUBILEE HOUSE, 3 THE DRIVE, WARLEY, BRENTWOOD, ESSEX. CM13 3FR. IGNITE INSURANCE BROKERS LTD IS AUTHORISED AND REGULATED BY THE FINANCIAL CONDUCT AUTHORITY UNDER NO. 840946"

Vehicle Immobiliser approved by TASSA

AMPIRE WFS400 LN (CAR AND VAN)

- No cables in the vehicle are cut during installation
- Immobilisation by CAN data communication with the control button of the car
- 1 to 15-digit PIN code via CAN and LIN Bus-supported buttons on the steering wheel or dashboard
- The WFS400-LIN electronics cannot be tracked in the vehicle
- The immobiliser cannot be bypassed electronically
- No radio signals are sent or received
- No additional remote controls or transponders are needed
- Uses the vehicle's own CAN data bus
- Silent operation without relay click noise
- PIN code can be changed at any time
- Service mode for garages or valet parking
- Optional TASSA-approved and accredited installation.

The CAN BUS FIREWALL is probably the first retrofittable immobiliser that communicates bi-directionally over up to two CAN and one LIN bus data system. This digital immobiliser helps protect your car from theft, Key cloning, Keyless range extension, learning vehicle keys, hacking the key code from the vehicle key, and even stealing the owner's key. Only towing the car is still possible because a car thief will never be able to drive away with your car. The new WFS400-LIN is the third generation of the CAN BUS FIREWALL protection and is a vastly improved version over its predecessor in many ways and in its functionality. The WFS400-LIN does not require additional remote controls, transponders, or driver cards. No flashing LED or keypads can lead to the installation of the device located in your vehicle. In addition, the electronics are extremely compact, so the installation can be covertly hidden within the vehicle's wiring harness. The system is armed automatically when the ignition is switched off. To disarm the system, you have to use existing switches within your vehicle. You can designate your code using buttons on the steering wheel, the navigation or in the dash. The available buttons are vehicle-specific and are listed in the compatibility list. You must enter this code before each trip. The combination you choose is like entering the PIN for your credit/debit card. The AMPIRE WFS400 LN is now TASSA-approved. After rigorous testing, the immobilisers have passed all the tests first time. TASSA is an insurance-recognised body for testing immobilisers. If your insurance company requires a TASSA-approved immobiliser, then Tracker999 can supply and install it, but you will need to add the approved TASSA installation option to your order.

AVAILABLE IN BOTH THE APPLE ISTORE AND THE GOOGLE PLAY STORE, THE TRACKING APP ALLOWS YOU TO ACCESS YOUR TRACKING SYSTEM WHILST ON THE GO, ENSURING YOU HAVE COMPLETE CONTROL OF YOUR FLEET AND CLIENTS, AT YOUR FINGERTIPS.

GET LIVE-STREAMING VIDEO FOOTAGE WITH OUR 4G INTEGRATED TELEMATICS DASH CAM

We offer a wide array of dashboard camera systems that feature multiple cameras such as road-facing, driver-facing, inward-facing, side-mounted, and backup cameras to help monitor and protect your cargoes and drivers en-route and vehicles in the yard.

In addition to all the things that a dashcam can do, our dashcams are also equipped with GNSS modules to record the locations of your vehicles. In the event of reckless/dangerous driving or collisions, video footage will be stored on the device (that allows for a max of 2*256GB SD cards) or on a cloud server as evidentiary support to exonerate innocent drivers in the event of false claims.

You can have more comprehensive insight into your fleet if you choose to bind your devices with our platform – Tracker 999. On Tracker 999, you can simultaneously track multiple vehicles and view their live video feed. The Tracker 999 mobile app enables you to monitor your assets 24/7 from anywhere. We offer ready-to-deploy solutions (with IoT SIM cards for worldwide connectivity) as well as OEM, ODM, and OBM services to suit your industry-specific needs. Please don't hesitate to contact us, we are always ready to help.

JC400D is a video telematics system featuring two cameras, an integrated 1080P road-facing one and a detachable driver-facing one. JC400D leverages high-end DMS technology and helps capture what matters most to your business to coach your drivers, mitigate risks, defend against fraudulent insurance claims, and protect your business' reputation. The JC400D LTE dash camera system works independently of any phone or hotspot, ensuring reliable and smooth recording on the road.
